INTRODUCTION

- 1 out of every 4 workers contacts chemicals on the job.
- In many cases, the chemicals at work are no more dangerous than those at home.
- Workplace situations will usually have a greater exposure, concentrations are higher and exposure time is longer.
- OSHA implemented Hazard Communication Standard or the “Right to Know Law” in the 1980’s.

OVERVIEW OF REGULATIONS AND STANDARD

- **Intention is to help make the workplace safer.**
- **States that all employees have a “right to know” what chemicals you are working with or around.**
- **Requires that all chemicals be fully evaluated for possible physical or health hazards.**
- **All information relating to these hazards is to be available to employees.**

REGULATION & STANDARD CONTINUED

- **Involves anyone who comes into contact with chemicals.**
- **Everyone needs to know what they work with and how to protect themselves.**
- **Training & written materials inform you about chemicals that you work with.**
- **Always ask questions of your supervisor about chemical use, MSDS's and the company's written program if you are not sure.**
